

Testing Module for Bloodborne Pathogens, TB Awareness, & Fire Safety

Student Information:

Student Name: _____ Date: _____

Position: _____

Location: _____

Instructions

Watch "Workplace Bloodborne Pathogens (2018)" on YouTube -

<https://www.youtube.com/watch?v=CT-97MtxZX0>.

Review the Civitan Foundation, Inc., Hazardous Communication packet.

This test is comprised of both True/False and Multiple Choice questions.

Please answer each question by circling the correct answer.

Training Department Use Only

Grader: _____

Number of Answers Missed: _____

Percentage Score

PASS

FAIL

1. The two diseases specifically addressed by the OSHA Bloodborne Pathogen Standard are:
 - a. TV & HBO
 - b. TB & TV
 - c. HBV & HIV
 - d. TB & Syphilis

2. There is no cure for Hepatitis B.
 - a. True
 - b. False

3. Hepatitis means:
 - a. Getting tight with your hepa
 - b. Inflammation of the liver
 - c. Inflammation of the colon
 - d. Inflammation of the spleen

4. Hepatitis B is transmitted primarily through blood to blood contact.
 - a. True
 - b. False

5. Symptoms of HBV are very much like a mild flu; however, people who are infected will often show no symptoms for some time.
 - a. True
 - b. False

6. The HBV vaccination is free to employees.
 - a. True
 - b. False

7. If you sign the Hepatitis B Vaccine waiver form (declining the vaccination), you cannot change your mind at a later date.
 - a. True
 - b. False

8. Once a person has been infected with HIV, the symptoms always appear immediately.
 - a. True
 - b. False

9. AIDS is a fatal disease, and while treatment for it is improving, there is no known cure.
- True
 - False
10. HBV and HCV cannot be transmitted through contact with saliva.
- True
 - False
11. Any body fluid that is visibly contaminated with blood is potentially infectious.
- True
 - False
12. In most work situations, transmission of Bloodborne pathogens is most likely to occur because of:
- Accidental puncture from sharps
 - Contact between broken skin and infected body fluids
 - Contact between mucous membranes and infected body fluids
 - All of the above
 - None of the above
13. Universal Precautions means that whether or not you think the blood/body fluid is infected with Bloodborne pathogens, you ...
- Call your supervisor to clean it up
 - Treat it like it is
 - Throw sand on it
 - Run away from it
 - None of the above
14. PPE stands for:
- Preventative Personal Equipment
 - Protective Pathogen Equipment
 - Proper Protective Equipment
 - All of the above
15. PPE consists of:
- Gloves
 - Aprons
 - Face Shield
 - All of the above

16. The Exposure Control Plan is in effect throughout all programs and is available to all employees upon request.
- True
 - False
17. Hand washing is one of the least important (and hardest) practices used to prevent transmission of Bloodborne pathogens.
- True
 - False
18. Even though you are working in an area where there is reasonable likelihood of exposure, you can still:
- Eat and drink in the area
 - Smoke in the area
 - Apply cosmetics or lip balm
 - Handle contact lenses
 - None of the above
19. Decontamination should be accomplished by using:
- Only water and a mop
 - Throwing sand on it
 - Pure bleach and no water
 - A 10% bleach solution with water
 - None of the above
20. The proper steps for cleanup start with covering the spill with paper towels, rags or absorbent powder:
- True
 - False
21. Mops, sponges, re-usable gloves, buckets and pails used to clean up a spill of blood or potentially infectious materials :
- Must be put outside to dry
 - Must be decontaminated immediately
 - Must be discarded immediately
 - None of the above

22. You can throw regulated waste (red bags) into the regular trash only by approval of your supervisor:
- True
 - False
23. Needle can be recapped as long as you are very careful:
- True
 - False
24. Broken glassware will not be picked up directly with the hand:
- True
 - False
25. Tuberculosis is an infectious disease, which spreads when infected persons touch other people:
- True
 - False
26. Signs and symptoms that a latent TB infection has become active can be, coughing, fever, fatigue, night sweats, weight loss:
- True
 - False
27. If you are diagnosed with pulmonary or laryngeal TB, you should be restricted from work until:
- You get treatment
 - Your cough is resolved
 - A Physician certifies that you are no longer contagious
 - All of the above
28. There are 4 classes of fires, A,B,C, and D:
- True
 - False
29. Class K fires involve the burning of:
- Wood, paper, cloth, rubber and certain plastics
 - Gases or flammable liquids, grease, oil, paint and solvents
 - Cooking oils and animal fats
 - Various metals
30. The P-A-S-S method for using Fire Extinguishers is:
- Squeeze the trigger, Aim at the base, Sweep side-to-side, Pull the pin
 - Pull the pin, Aim at the base, Squeeze the trigger, Sweep side-to-side
 - Pull the pin, Sweep side-to-side, Aim at the base, Squeeze the trigger
 - Pull the pin, Squeeze the trigger, Sweep side-to-side, Aim at the base
